

FasterReader::FasterReader

FasterReader::Reset

FasterReader::Initialise

```
graph LR; A[FasterReader::FasterReader] --> C[FasterReader::Initialise]; B[FasterReader::Reset] --> C;
```

The diagram illustrates a flow where two methods, `FasterReader::FasterReader` and `FasterReader::Reset`, both point to a common method, `FasterReader::Initialise`. The `FasterReader::Initialise` method is highlighted in a grey box, while the other two are in white boxes. Arrows indicate the direction of the flow from the left boxes to the right box.
