

FasterReader::FasterReader

FasterReader::Reset

FasterReader::Initialize

```
graph LR; A[FasterReader::FasterReader] --> C[FasterReader::Initialize]; B[FasterReader::Reset] --> C;
```

The diagram illustrates a flow where two methods, `FasterReader::FasterReader` and `FasterReader::Reset`, both point to a single method, `FasterReader::Initialize`. The `FasterReader::Initialize` method is highlighted in a gray box, while the others are in white boxes. Blue arrows indicate the direction of the flow from the left boxes to the right box.
