

Calibration::calculate

Calibration::calibrateRootData

Calibration::loadRootData

```
graph LR; A[Calibration::calculate] --> C[Calibration::loadRootData]; B[Calibration::calibrateRootData] --> C;
```

The diagram illustrates a dependency or call relationship. Two functions, 'Calibration::calculate' and 'Calibration::calibrateRootData', are shown on the left. Arrows from both of these functions point to a third function, 'Calibration::loadRootData', which is highlighted with a gray background. This suggests that 'loadRootData' is a common dependency or a function that is called by both 'calculate' and 'calibrateRootData'.
